

Simplicity, Flexibility and Control

Whether your daily mailing requirement is 20 or 20,000 items, the Pitney Bowes B921 Electronic Postage Meter brings the very latest in mailing technology to your mailroom – at a price you can afford.

Ease of use

- ◆ So simple to use, thanks to the B921's eight line display giving prompts and information in plain language.
- ◆ For speed and added convenience, the programmable memory key allows simple recall of your four most-used postage rates.
- ◆ The B921 Smart Dater eliminates the inconvenience and cost of franking mail with yesterday's date.

POSTAGE BY PHONE®

- ◆ The B921 incorporates Postage by Phone, which allows you to recredit your meter quickly and simply over the telephone.
- ◆ When you run low on meter credit or when a sudden peak in mailing is expected, there's no need to take your meter to a post office – just make a 90 second call and you're back in business.

Cost and security control

- ◆ Integral accounting lets you monitor expenditure for up to 10 different categories – for example by departments, clients or business partners.
- ◆ Through the use of optional passwords, unauthorised use of the meter can be prevented and correct allocation of postal charges assured.

Comprehensive reporting

- ◆ You can access the accounting information daily, weekly or whenever suits your management reporting.
- ◆ Details are given on the B921 display and can be downloaded to a PC or produced as hard copy by attaching a printer.

Datalink options

- ◆ The enhanced accounting package allows chargeback for up to 500 accounts.
- ◆ Datalink enables simultaneous connection to scale and PC/printer, eliminating the need to connect and disconnect every time.
- ◆ One touch Postage by Phone – even easier and quicker meter recrediting, via a modem.

Create your own mailing system

- ◆ The B921 fits quickly and easily on to the Pitney Bowes range of mailing bases, and by adding an electronic postal scale, the correct postage can be calculated and the meter set automatically – eliminating any costly errors.
