 Pitney Bowes certifies that the U561 Mailing System complies with the requirements of the Low Voltage Directive 73/23/EEC and the EMC Directive 89/336/EEC.

U561

MAILING SYSTEM

U561 Automatic Mailing System...

Fast and flexible mail processing for your business

Manually preparing your mail - whether letters, invoices, statements or direct mail - can be time consuming and tedious.

As pressure mounts at the end of the day to process that important mail in time for the final postal collection, you need to be sure that your mailing system is up to the job.

Choosing Pitney Bowes ensures you can process your mail with the minimum amount of effort and in a fraction of the time - leaving your staff free to concentrate on other, more important tasks.

The U561 is a completely automatic mail processing system, which feeds, seals, franks and stacks mail in one operation. It's ideal for mid to high volume applications, especially when dealing with different types and sizes of mail.

Easy Operation - Centralised Control Panel

Reasons for you to choose the U561

Fast and flexible, the U561 delivers unmatched efficiency for mid to high volume mailers.

- ◆ **Be efficient** - feeds, seals, franks and stacks up to 170 pieces per minute.
- ◆ **Be versatile** - the smallest postcard or the largest (C4) envelope, the U561 does them all, thanks to its extra wide feed deck. And to seal without franking the "Seal Only" mode conveniently and quickly handles payroll and other internal communications.
- ◆ **Be secure** - the automatic sealing mechanism creates a positive, even seal - every time, eliminating the need for expensive self-seal envelopes.

Centralised electronic control panel

Extendible side guide

Quick and Easy Parcel Processing

- ◆ **Be cost effective** – use the U561 to handle your parcels. The especially large tape roll provides up to 1320 tapes, wet or dry, before it needs to be changed. So if you are processing parcels regularly, the gummed tapes of the U561 may often prove more cost effective than self-adhesive labels.

It's easy, it's dependable

The U561 is proven, trusted and reliable - a sound investment for your business.

- ◆ **Easy** – the centralised electronic control panel is sophisticated, yet user-friendly. Clearly displayed messages at every step provide error free processing.
- ◆ **Dependable** – from a company you can count on, with a heritage spanning over 75 years and two million other customers like you.

Electronic technology provides the flexibility you need

Managing postage expense is an important task for most businesses and the U561 System offers a choice of options to meet your specific needs.

- ◆ **Never run out of postage again** – with *POSTAGE BY PHONE*™ resetting. You can avoid trips out of the office by recrediting your meter quickly and easily, over the phone, in less than 90 seconds.
- ◆ **Efficient and accurate cost control** – down to the penny. Keep track of postage for up to 500 accounts.

Save money on your postage with an electronic scale

If you process large envelopes or small parcels, one of the best ways to save money is through an electronic postal scale.

- ◆ **Save on postage expense** – through precise electronic weighing. This avoids borderline overpayments or mistaken readings and independent surveys suggest these savings can be as high as 20%.
- ◆ **Models to suit every need** – choose from 2, 5, 12 or 35kg capacities.
- ◆ **Easy to operate** – the 5, 12 & 35kg models have an eight line graphic display, operator prompts and four job presets.
